SUBJECT INDEX TO VOLUME 23

Analytical microscopy

Size and shape dependence of the surface plasmon frequencies for supported metal particle systems, *Wang and Cowley* 23 (1987) 97

Transmission electron microscopy study of the reaction of Sn_9^{4-} Zintl ions with single crystal Au films, *Treacy, Haushalter and Rice* 23 (1987) 135

The determination of site occupancies in garnet by planar and axial ALCHEMI, *Otten and Buseck* 23 (1987) 151

When is parallel illumination best for ALCHEMI? *Krishnan* 23 (1987) 199

Foreword to Chemical Reactions and the Electron Microscope, ASU Workshop, January 1987, *Eds. Smith and Barry* 23 (1987) 259

Laser photochemical reactions, *Ehrlich, Rothschild and Black* 23 (1987) 283

The electron-beam-induced reduction of transition metal oxide surfaces to metallic lower oxides, *Smith, McCartney and Bursill* 23 (1987) 299

Phase transformations as studied by electron microscopy, *Van Landuyt, Van Tendeloo and Amelinckx* 23 (1987) 371

Structural transitions in ionic conductors and optical materials, *Davies and Garzon* 23 (1987) 397

Crystallization, resistivity and microstructure of co-deposited metal silicon thin film alloys, *Smith, Tu and Weiss* 23 (1987) 405

Structural transformation and chemical reduction of $Pr_{24}O_{44}$ induced by the electron beam during microscopical examination, *Schweda, Eyring and Smith* 23 (1987) 443

Electron-induced decomposition of rubidium chromium fluoride, *Sharma, Barry and Eyring* 23 (1987) 453

Conventional electron microscopy

Transmission electron microscopy study of the reaction of Sn_9^{4-} Zintl ions with single crystal Au films, *Treacy, Haushalter and Rice* 23 (1987) 135

Microstructural evolution during the decomposition of $Mg(OH)_2$, *Dahmen, Kim and Searcy* 23 (1987) 365

Transmission electron diffraction and microscopy of condensed sulphur hexafluoride, *Raynerd and Venables* 23 (1987) 433

Cryomicroscopy

High resolution cryo system designed for JEM 100CX electron microscope, *Jeng and Chiu* 23 (1987) 61

Diffraction and optical diffraction

On the phase-object function, used in dynamical electron diffraction calculations, *De Jong, Coene and Van Dyck* 23 (1987) 3

Electron resonance channeling on crystal surfaces in reflection high energy electron diffraction geometry, *Wang, Lu and Cowley* 23 (1987) 205

Phase transformation as studied by electron microscopy, *Van Landuyt, Van Tendeloo and Amelinckx* 23 (1987) 371

Transmission electron diffraction and microscopy of condensed sulphur hexafluoride, *Raynerd and Venables* 23 (1987) 433

Electron energy-loss spectroscopy

Size and shape dependence of the surface plasmon frequencies for supported metal particle systems, *Wang and Cowley* 23 (1987) 97

An approximate deconvolution for EELS quantification of thicker samples, *Bauer and Scholz* 23 (1987) 109

Electron energy-loss spectroscopy and chemical change, *Egerton, Crozier and Rice* 23 (1987) 305

Spatially resolved electron energy-loss spectroscopy of MoS_2 platelets, *Disko, Treacy, Rice, Chianelli, Gland, Halbert and Ruppert* 23 (1987) 313

High resolution

Difference Fourier analysis of "surface features" of bacteriorhodopsin using glucose-embedded and frozen-hydrated purple membrane, *Jaffe and Glaeser* 23 (1987) 17

A new resolution criterion based on spectral signal-to-noise ratios, *Unser, Trus and Steven* 23 (1987) 39

Surface processes observed by high-resolution electron microscopy: beam-induced transformation and reduction in a modified β-PbO_2 crystal, *Kang and Eyring* 23 (1987) 275

High-resolution transmission electron microscopic observations of grain boundaries and surfaces on Cu–Te crystals grown by

a solid–solid reaction, *Shiojiri, Isshiki, Okashita, Hirota, Maeda and Sekimoto* 23 (1987) 355
In situ high-resolution electron microscopy reactions in semiconductors, *Sinclair, Parker and Kim* 23 (1987) 383
High-resolution scanning electron microscopy of surface reactions, *Liu and Cowley* 23 (1987) 463

Image processing, 3D reconstruction
How to obtain a thickness-independent image in a STEM *Jeanguillaume and Tencé* 23 (1987) 67
Simulation of annular dark field STEM images using a modified multislice method, *Kirkland, Loane and Silcox* 23 (1987) 67
A computational assessment of a method for mapping localised displacement fields at boundaries, *Donovan and Stobbs* 23 (1987) 119

Instrumentation
High resolution cryo system designed for JEM 100CX electron microscope, *Jeng and Chiu* 23 (1987) 61
Scanning tunneling microscope combined with scanning electron microscope, *Ichinokawa, Miyazaki and Koga* 23 (1987) 115

Methods and techniques
Difference Fourier analysis of "surface features" of bacteriorhodopsin using glucose-embedded and frozen-hydrated purple membrane, *Jaffe and Glaeser* 23 (1987) 17
An approximate deconvolution for EELS quantification of thicker samples, *Bauer and Scholz* 23 (1987) 109
A computational assessment of a method for mapping localised displacement fields at boundaries, *Donovan and Stobbs* 23 (1987) 119
When is parallel illumination best for ALCHEMI? *Krishnan* 23 (1987) 199
The use of RF-plasma reaction for in-situ transmission electron microscopy studies, *Poppa and Moorhead* 23 (1987) 271

New developments
Observation of electrostatic fields by electron holography: the case of reverse-biased p–n junctions, *Frabboni, Matteucci and Pozzi* 23 (1987) 29
Scanning tunneling microscope combined with scanning electron microscope, *Ichinokawa, Miyazaki and Koga* 23 (1987) 115

Particle optics, experimental
A new resolution criterion based on spectral signal-to-noise ratios, *Unser, Trus and Steven* 23 (1987) 39
Optimization of small electron probes, *Crewe* 23 (1987) 159
Chromatic aberration effects in small electron probes, *Shao and Crewe* 23 (1987) 169

Radiation damage and contamination
Some electron-induced changes at surfaces, *Lichtman* 23 (1987) 291
The electron-beam-induced reduction of transition metal oxide surfaces to metallic lower oxides, *Smith, McCartney and Bursill* 23 (1987) 299
The effect of dose rate on imaging aromatic organic crystals, *Fryer* 23 (1987) 321
Chemical changes in electron-beam-irradiated polymers, *Vesely and Finch* 23 (1987) 329
Electron-beam sensitivity in organic specimens, *Hobbs* 23 (1987) 339
Damage effects of high energy electrons on metals, *King, Benedek, Merkle and Meshii* 23 (1987) 345
Electron beam sensitivity of zeolite L, *Treacy and Newsam* 23 (1987) 411
Damage of zeolite Y in the TEM and its effect on TEM images, *Csencsits and Gronsky* 23 (1987) 421
Structural transformation and chemical reduction of $Pr_{24}O_{44}$ induced by the electron beam during microscopical examination, *Schweda, Eyring and Smith* 23 (1987) 443
Electron-induced decomposition of rubidium chromium fluoride, *Sharma, Barry and Eyring* 23 (1987) 453

Scanning electron microscopy
Scanning tunneling microscope combined with scanning electron microscope, *Ichinokawa, Miyazaki and Koga* 23 (1987) 115

Scanning transmission electron microscopy
How to obtain a thickness-independent image in a STEM, *Jeanguillaume and Tencé* 23 (1987) 67
Study of freshly deposited metallic particles on MgO crystal surfaces by scanning reflection electron microscopy, *Ou and Cowley* 23 (1987) 263

Specimen preparation
The preparation of transmission electron microscope specimens from compound semiconductors by ion milling, *Chew and Cullis* 23 (1987) 175

Surfaces, clusters, interfaces and particles
Observation of double contours of monoatomic steps on single crystal surfaces in reflection electron microscopy, *Uchida and Lehmpfuhl* 23 (1987) 53
Electron resonance channeling on crystal surfaces in reflection high energy electron diffraction geometry, *Wang, Lu and Cowley* 23 (1987) 205
Surface facetting and polarity of alumina, *Bursill, Lin and Smith* 23 (1987) 223

Some electron-induced changes at surfaces, *Lichtman* 23 (1987) 291
Microstructural evolution during the decomposition of $Mg(OH)_2$, *Dahmen, Kim and Searcy* 23 (1987) 365
Foreword to Chemical Reactions and the Electron Microscope, ASU Workshop, January 1987, *Eds. Smith and Barry* 23 (1987) 259
Study of freshly deposited metallic particles on MgO crystal surfaces by scanning reflection electron microscopy, *Ou and Cowley* 23 (1987) 263
Surface processes observed by high-resolution electron microscopy: beam-induced transformation and reduction in a modified β-PbO_2 crystal, *Kang and Eyring* 23 (1987) 275
High-resolution transmission electron microscopic observations of grain boundaries and surfaces on Cu–Te crystals grown by a solid–solid reaction, *Shiojiri, Isshiki, Okashita, Hirota, Maeda and Sekimoto* 23 (1987) 355
High-resolution scanning electron microscopy of surface reactions, *Liu and Cowley* 23 (1987) 463

Abstracts / Announcements / Book reviews / Comments / Editorials / Reports / Miscellaneous

Abstracts of papers presented at the 21st Scientific Meeting of The Israel Society of Electron Microscopy, Haifa, May 1987, *Ed. Kessel* 23 (1987) 229
